<b>Section 4: FIRST AID MEASURES</b>
--------------------------------------

#### 4.1 Symptoms/Effects:

Acute: Eye contact may cause eye irritation. Repeated or prolonged skin contact may cause skin irritation. Ingestion may irritate the gastrointestinal tract.

Chronic: No known chronic effects.

**4.2 Eyes:** Immediately flush with large quantities of water for 15 minutes. Hold eyelids apart during irrigation to insure thorough flushing of the entire area of the eye and lids. Obtain medical attention if irritation occurs.

**4.3 Skin:** Immediately flush with large quantities of water. Remove contaminated clothing under a safety shower. Continue rinsing. Obtain medical attention if irritation occurs.

**4.4 Ingestion:** If victim is conscious, give 2 to 4 glasses of water and induce vomiting by touching finger to back of throat. Obtain medical attention.

**4.5 Inhalation:** Remove victim from contaminated atmosphere. If breathing is labored, administer Oxygen. If breathing has ceased, clear airway and start CPR. Obtain medical attention.

<b>Section 5: FIRE FIGHTING MEASURES</b>
--

#### 5.1 Flammable Properties: (See Section 9, for additional flammable properties)

**NFPA:** Health - 1 Flammability - 0 Reactivity - 0

#### 5.2 Extinguishing Media:

**5.2.1 Suitable Extinguishing Media:** Not flammable, use media suitable for combustibles involved in fire.

**5.2.2 Unsuitable Extinguishing Media:** None known

### 5.3 Protection of Firefighters:

#### 5.3.1 Specific Hazards Arising from the Chemical:

**Physical Hazards:** Heating (flames) of closed or sealed containers may cause violent rupture of containers due to thermal expansion of compressed gases.

**Chemical Hazards:** Heating causes release of oxides of sulfur. Sulfur dioxide is highly irritating to the eyes, respiratory tract and moist skin.

#### 5.3.2 Protective Equipment and Precautions for Firefighters:

Firefighters should wear self-contained breathing apparatus (SCBA) and full fire-fighting turnout gear. Keep containers/storage vessels in fire area cooled with water spray.

## Section 6: ACCIDENTAL RELEASE MEASURES

**6.1 Personal Precautions:** Use personal protective equipment specified in Section 8. Isolate the hazard area and deny entry to unnecessary, untrained and unprotected personnel.

**6.2 Environmental Precautions:** Keep out of "waters of the United States" because of potential aquatic toxicity.

#### 6.3 Methods of Containment:

**Small Release:** Confine and absorb small releases with sand, earth or other inert absorbent.

**Large Release:** Shut off release if safe to do so. Dike spill area with earth, sand or other inert absorbents to prevent runoff into surface waterways (potential aquatic toxicity), storm drains and sewers.

#### 6.4 Methods for Cleanup:

**Small Release:** For small areas shovel up the absorbed material and place in drums for disposal as a chemical waste.

**Large Release:** Recover as much of the spilled product as possible using portable pump and hoses. Use material as originally intended or dispose of as a chemical waste. Treat remaining material as a small release (above).

**Section 7: HANDLING and STORAGE**

- 7.1 Handling:** Avoid contact with eyes. Use only in a well ventilated area. Wash thoroughly after handling product. Avoid prolonged or repeated contact with the skin.
- 7.2 Storage:** Store in well ventilated areas. Do not store combustibles in the area of storage vessels. Keep away from any sources of heat or flame. Store totes and smaller containers out of direct sunlight at moderate temperatures. (See Section 10.5 for materials of construction).

**Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION**
**8.1 Exposure Guidelines:**

Chemical	OSHA PELs		ACGIH TLVs	
	TWA	STEL	TWA	STEL
Thiosulfuric acid (H <sub>2</sub> S <sub>2</sub> O <sub>3</sub> ), calcium salt	None	None	None	None
Water	None	None	None	None

- 8.2 Engineering Controls:** Keep eye wash/safety showers in areas where product is commonly used.

**8.3 Personal Protective Equipment (PPE):**

- 8.3.1 Eye/Face Protection:** Chemical goggles and a full face shield.
- 8.3.2 Skin Protection:** Neoprene rubber gloves and apron should be worn to prevent repeated or prolonged contact with the liquid. Wash contaminated clothing prior to reuse.
- 8.3.3 Respiratory Protection:** None required. If conditions exist where mist may be created, a NIOSH/MSHA approved mist respirator should be worn.
- 8.3.4 Hygiene Considerations:** There are no known hazards associated with this product when used as recommended, however common good industrial hygiene practices should be followed, such as washing thoroughly after handling and before eating or drinking.
